

Highlights

- Clean up your network by removing abandoned databases as well as Quickr rooms and places.
- Eliminate security hazards from unauthorized users accessing applications.
- Reduce license purchases by recycling User IDs.
- Reduce costs by identifying inactive and unused resources.
- Optimize deployments by load balancing and replication technology planning.
- Measure new application adoption.
- Deliver personalized information via customizable portals.

Permesssa Collaboration Control! v6

Permesssa Collaboration Control! helps to reduce IT infrastructure costs, improve service level performance and tighten security by providing comprehensive analyses of application and database usage across the enterprise.

Specifically, Permesssa Collaboration Control! identifies misused resources that cause wasted expense and increase security risk. Such resources include abandoned databases, mailboxes and User IDs. These can be easily deleted or reallocated to free up server storage space and network bandwidth without disrupting business operations.

Permesssa Collaboration Control! works by correlating user activity and application traffic to produce detailed reports and analysis. Data collection is completed and presented in easy-to-use portals without tedious manual effort. This can result in substantial and immediate cost savings.

Features

- Easily scalable across the enterprise. There are no agents to install, maintain or configure.
- Eliminates the time-consuming, manual consolidation of server logs and reports.
- Web-based portals assemble information for a particular audience or specific areas of interest. Customize portals to distribute and share reports using only a web browser. No additional software is required.
- Automatically generate reports and notify recipients by email when they are updated. Schedule reports to eliminate the need to manually generate them.
- Report Designer lets you quickly and easily create custom reports using a simple and intuitive drag and drop interface,

Inactive Rooms - No Activity in over 30 Days

This report shows all places and rooms that have not been accessed for over 30 Days. Use this report as a template to create reports for a longer inactivity period to identify places and rooms that can be retired. [Hide Description](#), [Show Servers](#).

| Place | Room | Days Elapsed with No User Access |
|---------------------------|--------------------------------------|----------------------------------|
| QuickPlace\administration | servers | 106 |
| QuickPlace\administration | Platform | 106 |
| QuickPlace\administration | Network | 106 |
| QuickPlace\supportcalls | Replication Control | 35 |
| QuickPlace\supportcalls | Email Control | 35 |
| QuickPlace\supportcalls | Collaboration Control | 35 |
| QuickPlace\supportcalls | Application Control | 35 |
| LotusQuickr\engineering | v4.5 for Domino | 33 |
| LotusQuickr\engineering | Exchange (ECX and IFM for Microsoft) | 33 |
| LotusQuickr\engineering | Enforcer 1.5 | 33 |

providing detailed (down to the user) or summary (across the enterprise) reports and analysis.

- Supports IBM Domino applications, including both Quickr and Quickplace.
